
We build AI systems that complete real work.

PrimeArcTech turns costly workflows, credible product ideas, and partner briefs into controlled software.

OPERATING TEAMS / PRODUCT FOUNDERS / AGENCY PARTNERS

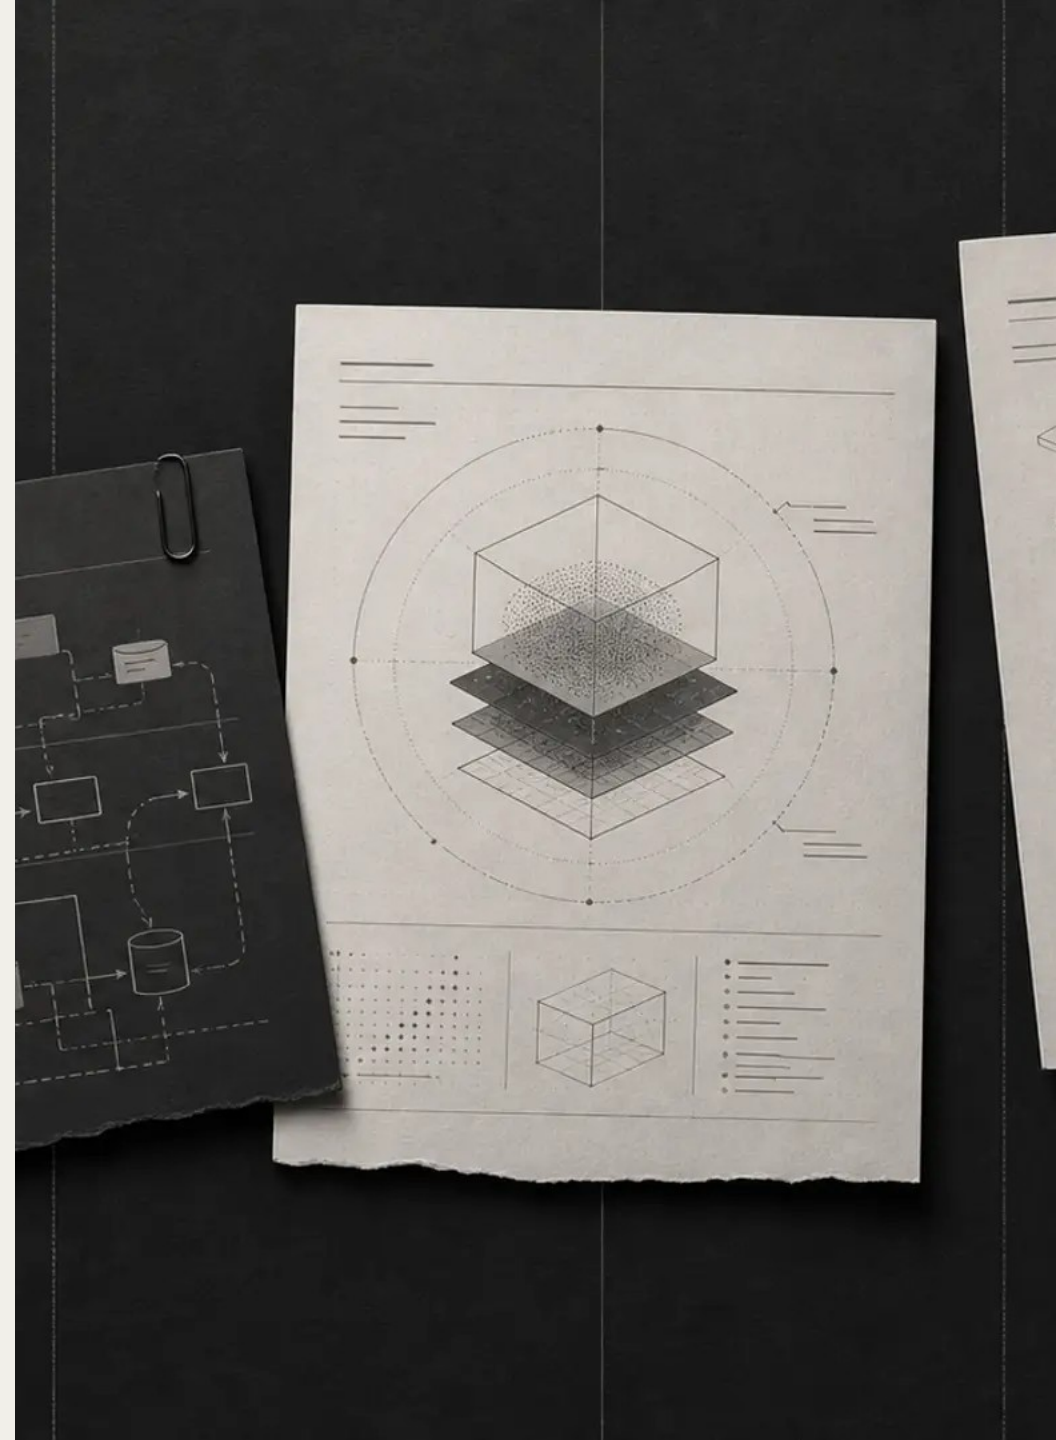

primearc.tech

Start with the work, not the model.

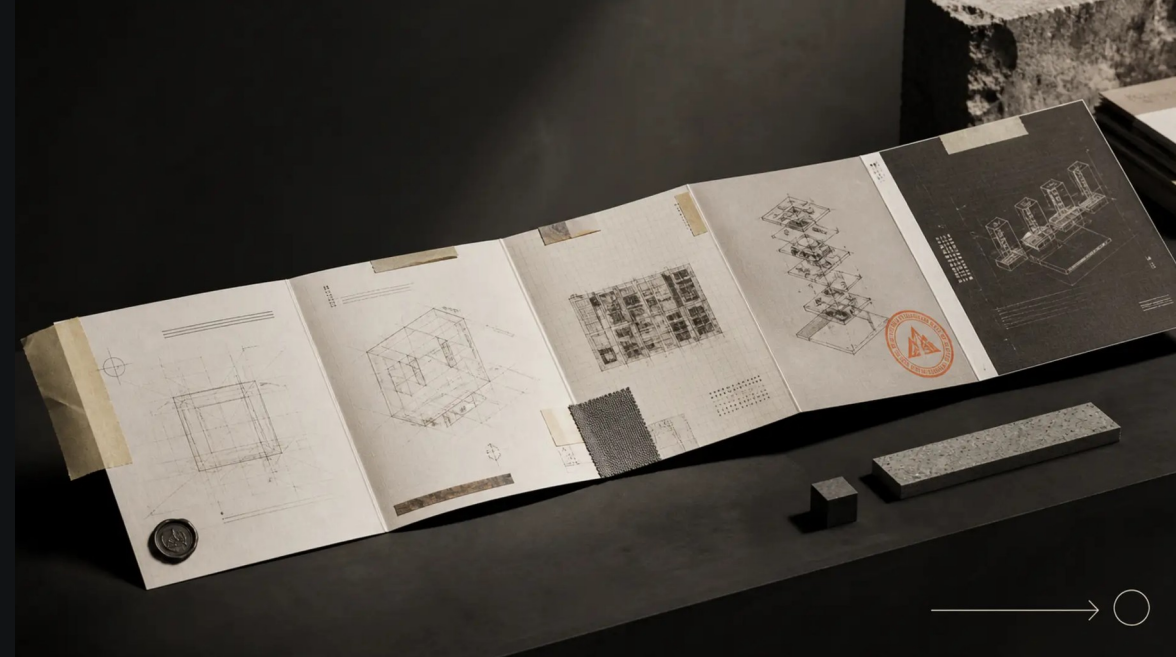

One costly pattern. One visible consequence. One owner who knows what good looks like.

-
- | | | |
|----|-----------------------------|--|
| 01 | OPERATING BOTTLENECK | Repeated calls, inboxes, documents, routing, approvals, or follow-up consume skilled time and still drop work. |
|----|-----------------------------|--|
-
- | | | |
|----|------------------------|--|
| 02 | AI PRODUCT IDEA | A promising demo needs policy, tools, failure paths, and a credible route to production. |
|----|------------------------|--|
-
- | | | |
|----|-------------------------|---|
| 03 | PARTNER DELIVERY | Your client needs specialist execution behind your relationship, with clean handoff and discretion. |
|----|-------------------------|---|
-
- If simpler software already solves it, we will say so.

We ship the operating layer around the model.

Context, tools, permissions, human exceptions, tests, and evidence of what happened.

FRAME

Workflow map
Success condition

PROTOTYPE

Smallest useful loop
Working behavior

ATTACK

Edge cases
Failure injection

SHIP

Deployment
Ownership + runbook

MONITOR

Receipts
Review + change log

WHAT LEAVES THE STUDIO

**Working software / Boundary policy / Adversarial test record / Failure paths /
Operator receipt / Launch runbook**

Direct ownership from framing through deployment. No mystery delivery layer.

OWNED PRODUCT / INSPECTABLE PROOF

FieldRelay makes the method visible.

A managed voice system for missed and after-hours home-service calls. One proving ground for our standard—not the limit of our studio.

DOES Answers, screens danger, qualifies, validates service area, and creates a provisional outcome.

REFUSES No diagnosis, repair instruction, firm estimate, invented booking, transfer, or provider success.

RETURNS Live transcript, policy events, provenance, failure state, and structured dispatcher receipt.

LIVE SANDBOX / primearc.tech/fieldrelay/demo

Start with one workflow. Leave with a decision.

Free AI Workflow Audit. Fit review, not disguised project.

YOU BRING

One repeated workflow or product brief.
What happens today.
What failure costs.
Who owns the outcome.

YOU LEAVE WITH

Best opportunity worth pursuing.
Smallest useful system scope.
Key risks and human controls.
Build, buy, narrow, or stop recommendation.
